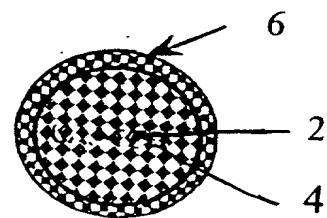

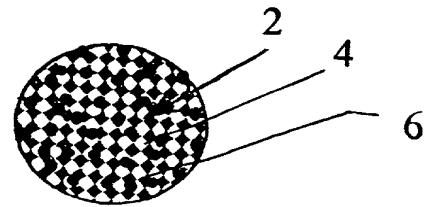

FIGURE 3

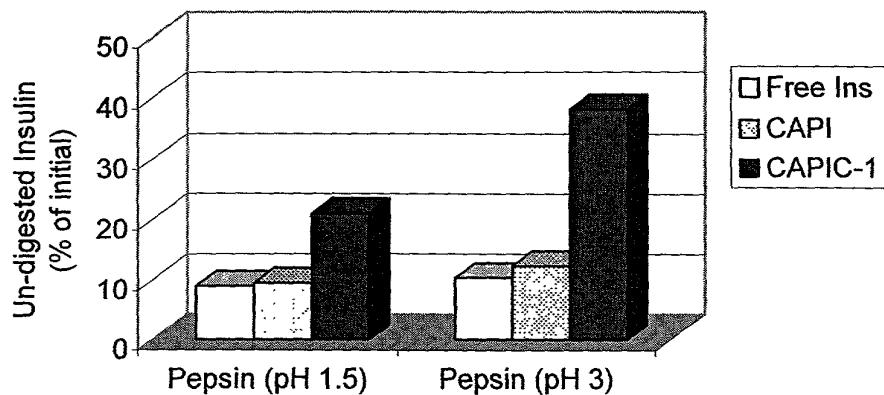

Figure 4. Stability of CAPIC oralformulation against digestive enzyme pepsin in pH 1.5 and 3 glycine buffer. 40 IU/ml insulin either free in solution, or in CAPI formulation, or CAPIC-1 formulation was incubated in 10 IU/ml pepsin for 30 min at 37C

FIGURE 4

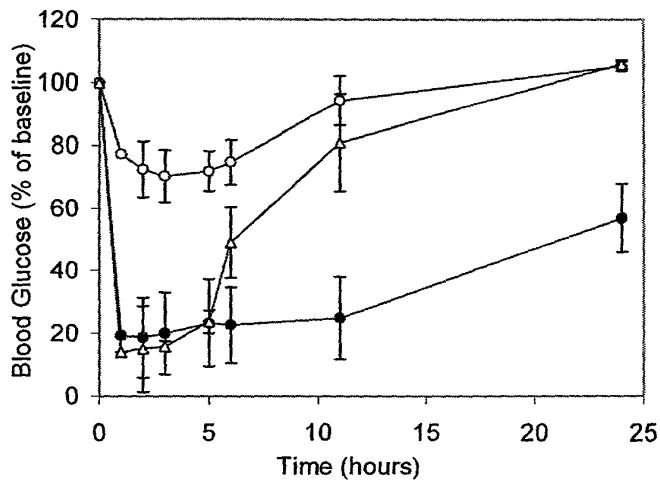

Figure 5. Blood glucose levels in fasted diabetic mice after graded doses of oral insulin in casein-coated CAP-PEG-Ins particles; ●—● 100 IU/Kg, oral dose of free insulin; ○—○ 100 IU/Kg, subcutaneous injection of free insulin; △—△ 12.5 IU/Kg
